

VIKING

THE WORLDWIDE
DIVING STANDARD

SIZE CHART

- Viking HD 1500 and HDS 1500

MEASUREMENTS OF VULCANIZED SUITS

The measurements in the chart below are taken on the mannequins used to vulcanize the suits. This means that the measurements noted are the actual sizing of the ready made suit. You will get the best result measuring a diver if he wears the undergarments intended for use when diving. Remember to add sufficient room for normal flexibility when measuring for a suit to avoid an all too tight fit.

SIZE CHART VIKING HD 1500 VIKING HDS 1500

[cm / inches]	HD 01	HD 02	HD 03	HD 04
Chest	125 / 49"	129 / 51"	133 / 52"	136 / 54"
